

**Protocol Signed, New Provisions
Government to Be Agreed Upon
and Diplomatic Relations Be-
tween United States and Mexico
Are to Be Resumed — America
Asks No Indemnity.**

The work that has been continued among the records of the treasurer and auditor of the county of Hawaii in the search for that missing balance has resulted in the uncovering of a number of the lost warrants and of the books containing the interest account on registered warrants, thereby permitting of a further reduction of the discrepancy between the books of the two departments. If the latest figures given out by Deputy County Auditor Brown prove correct on the checking up the missing balance has been located with twenty dollars, a negligible amount.

Mr. Brown has notified Commissioner Williamson of the result of his delving into the mass of figures and Mr. Williamson is gratified over the prospect of being able to include in the graft commission's report what will be practically a complete balance sheet up to the time when the commission took up the unravelling of the Big Island finances.

Report in July. The report of the commission will be ready, probably, by the middle of July, and the plan is to have it a thoroughly constructive document. I will contain a review of the commissioners' work, a statement of the steps taken to uncover the various defalcations and of the steps taken to secure restitution of a large part of the stolen money, a summary of the findings of the commissioners, based on their findings as to necessary amendments to the County Aet., and, finally, a series of draft bills, covering the recommendations and ready to be introduced into the legislature if the report be ac-

"Our report is to be practical in its findings and in its recommendations," says Mr. Williamson, "and we will embody our recommendations in bills worked out to cover the various points. If our report be found acceptable, the bills will be all ready for legislative action."

**HAWAIIANS LOOKED
FOR WITH INTEREST
IN SAN FRANCISCO**

SAN FRANCISCO, June 17.—The swimming delegations of Illinois and Hawaii, which were sent to compete today

for the big swimming meet to be held at Sutro Baths on the Fourth of July. Both contingents will arrive in San Francisco week after next, the islanders four days ahead of the national champions from the Illinois Athletic Club who are expected on the 27th.

Duke Kahanamoku will head the Hawaiians, while with the Easterners will come Michael McDermott, the marvelous long distance man, who will be matched in a race across the bay with Walter Pomeroy, H. J. Hebner, Perry McGilivray, and others.

Word has come from James E. Sullivan's office that the use of the name "national invitational meet" for the Fourth of July affair is objectionable.

Consequently the Pacific Association is looking for another cognomen which will suit the important occasion and not tread on the toes of Sullivan's of flea force.

Besides the invaders, the best talent of the Pacific Coast States will be in action, and one of the most interesting events in the history of speed swimming hereabout is being looked for

**CLOSES ACCOUNTS OF
LATE MARSHAL HENDRY**

The official accounts of the late United States Marshal Eugene R. Hendry, as presented yesterday to the federal court by Marshal Harry H. Holt, were approved by Judge Charles F. Clemons.

The total funds of the United States

government on hand on April 1 last amounted to \$9845.44, of which the sum of \$1839.12 was disbursed by the late Marshal between that date and April 22 last, leaving a balance on hand at the time of Hendry's death, amounting to \$8006.32, which was refunded by Marshal Holt and deposited to the credit of the treasurer of the United States of America in accordance with

A number of blank checks, signed by Marshal Hendry before his death were destroyed by order and in the presence of the court by Marshal Holt and Clerk Augustus E. Murphy. All of this closes the accounts of the late marshal insofar as the federal treasury was concerned.

John C. Searle has been informed by his attorneys in Washington that a patent was granted June 4 on the Searle system of irrigation.

Mr. Searle's invention covers the fundamental principle of irrigating crops by means of an automobile pump which runs a straddle of an irrigation ditch. As the machine moves forward it is.

Mr. Searle has been in correspondence with implement manufacturers on the Coast who have shown much interest in the theory of his patent. He expects

to go to California merely for the purpose of promoting this new invention which has fair to find wide application wherever irrigation of comparatively lowland lands is practiced.
